CLUE #1 Measurements given are for a Portrait card (you can make this landscape just watch how you cut the Designer Series Paper)

You will need three different patterns of Designer Series Paper

1. Basic White Cardstock for base – 5 ½" x 8 ½", scored at 4 ¼"
2. Designer Series Paper – choose two different patterns (2) 2" x 4"
3. Choose a Different Designer Series Paper – 4" x 5 ¼"
4. Basic White scrap
5. Colored Cardstock (2) 2 1/8" x 4 1/8", scrap
6. Adhesive - Liquid Glue (will work the best for this project),
7. Dimensionals
8. Stamps
9. Inks
10. Coloring tools if needed
11. Embellishments
12. Paper Trimmer
13. Snips
14. Punches, Dies

CLUE #2
Adhere DSP 4” x 5 ¼” to card base with adhesive

CLUE #3
Add both pieces of Designer Series Paper to the Colored Cardstock layers.

I recommend using Liquid glue since you have such a small border

CLUE #4
Add one DSP/Matt layer to the left side of the card front leaving about ½” from top and left side of DSP layer. Add this layer with adhesive

CLUE #5
Add one DSP/Matt layer to the right side of the card front leaving about ½” from the bottom and right side of DSP layer. Add this layer with Dimensionals

This layer will overlap the previous DSP/Matt layer

CLUE #6
Stamp greeting on Basic White Scrap, cut to size using trimmer, punches or dies

CLUE #7
Create a Matt Layer for your greeting layer and adhere the two together with adhesive

CLUE #8
Add your greeting/matt layer in the middle of your card front. Remember to add Dimensionals on the left side and adhesive on the right since you will be adding to two different layers

CLUE #9
Add embellishments to the Designer Series layers

CLUE #10

You have made a very easy card for any occasion! Does it need a stamped image or anything else? This is up to you as some Designer Series Papers can make the card!
